

PR is all about representing our club to the people who aren't in the club. For that, we need 3 things

1. Graphic design
2. Video editing
3. Videography/photography

1. Graphic Design

It includes poster design and merch design

Software required: Canva, Figma, Photoshop, Illustrator(perfection in any one of these, canva is a must)

2. Video Editing

Software required: Adobe Premiere Pro, DaVinci Resolve, CapCut (Perfection in any one good video editing software)

3.Videography/Photography:

Required skill set: Basic idea about angles and shots, what looks good on camera, being able to provide the editor with good footage

And most importantly a camera or a phone with a really good camera

And being a good public speaker, having good communication skills, creativity and ability to write content without AI and having a good sense of design also fall under PR

It is expected for you to be ready with your previous work, if any. And if you aren't familiar with any of the things mentioned above, you're expected to research about whatever you're interested in and be ready and enthusiastic to learn it.

ALL THE BEST!!
HOPE TO SEE YOU IN RC
